

**EMBRYONIC PLANT EXTRACTS (EPEs)** and their phytochemicals are the most effective blood cleansers detoxifying the Body Toxic Burden.

**Summary** by Dominique Richard as to why EPEs are the only nutritional and medicinal herbal extracts worth consuming in the world:

1. EPEs have the highest concentration of phytochemicals present and free from any adulterants or contaminants. They are the most energetic and polar extracts you will find anywhere.
2. Best Blood Surfactants (cleansers) to Detoxify and wash away ALL TOXINS that should never be found in human blood.
3. Some EPEs are selective Toxic Metals Chelator, while leaving unscathed essential minerals.
4. Removes endocrine disruptor's (EDs) such as microplastic (mimicking estrogen) now found in every single human being. Especially EPEs with high concentration of the phenolic acid called gallic acid will effectively detoxify microplastic.
5. EPEs are the Experts Endocrine Hormones Regulators.
6. Increases Autophagy and Somatic Cells Fitness thus increasing life span and best Antisenescence (antiaging) agents.
7. Increases Collagen and Elastin in addition to being Chondroprotective.
8. Selective apoptosis inducers while leaving unscathed healthy cells.
9. Cytokines modulator: COX-2, IL-1, IL-1 $\beta$ , IL-2, IL-6, IL-8, IL-12, LPS, NF-kB, iNOS, NO, PGE2, TNF- $\alpha$  inhibitor. The most potent antiinflammatory.
10. TH1 and TH2 immunomodulator.
11. Some EPEs increases neurogenesis and cognitive function.
12. Attenuates Advanced Glycation End Products (AGEs) and Lipofuscin.
13. Increases Osteogenesis, Antiosteoporotic.
14. Antiangiogenesis and most potent antioxidants and DNA repair.
15. Increases Nrf2, Catalase (CAT), Glutathione (GSH), and Superoxidase Dismutase (SOD). Increases detoxifying and antiaging enzymes.

16. Removing the body toxic burden optimized organs and glandular functions.

17. EPEs are the very best nutritional and therapeutic agents courtesy of nature.

There is a lot we can learn from the study of plants and their longevity, with their unsurpassed capacities to adapt to the ever so increase in pollution. Plants create new compounds to defend themselves and protecting us against environmental toxic insults; we are exposed to every day. Everyone seems much more concerned with the 0.9 grams percent cigarette's second-hand smoke, whereas no one talks about the graver 2 pounds of car emission, we breathe in daily, which is a lot more than 0.9% grams. The microplastic now found in every human being blood is a definite contributor to all the malignancies being diagnosed daily! Many physicians are not sufficiently trained to recognize and diagnose an environmental root cause of many conditions and diseases being misdiagnosed.
